Approving invoices

Updated 26 September 2018

You can choose to approve an invoice in the list of invoices, or by opening it with a double-click for a more detailed view. The account codes can be changed in both view settings.

- To use the function **My own purchase** you must open a detailed view of the invoice select > Open invoice details.
- If the invoice is correct, select **Approve invoice**.
- If necessary: Send the invoice back to the reviewer by clicking **More actions**.
